Time :- 8:00 am to 10:00 am

Duration :- 30 Hrs.

Platform :- Zoom Meeting App

Target Group :- B.Sc. I Year (Home Science) Students

Introduction –Natural resources are threatened by the anthropogenic activities so we are facing various problems like Global Warming drought, floods in India as well as globally so monitoring the quality of natural resources is the key point to know about quality of various natural resources like air, land and water for sustainability global ecosystem.

Objective of course -

1. To impart knowledge of importance of natural resources.
2. To develop skill in methods of monitoring qualities of natural resources.

Course content –Theory

- Unit1-Introduction ,concept of Ecosystem and conservation.
- Unit2 – Defination of Atmosphere ,air as natural resource, air pollution control methods
- Unit3 –Land as natural resources, land pollution, sustainability of ecosystem
- Unit4 – Wild Life conservation
- Unit5 –Effects of Global warming

Practical – Project work on the topics related to Unit 2,3,4.

Methodology of Training -

The course focused on the practical and applied methods by using the following concepts -

- Understanding the students about Conservation of Environmental resources
- Presenting the subject with power point presentation
- Participating the students in projects.
- Evaluation of their Understanding in the online examination
- After Passing the final examination with 40% marks the students were given e - certificates
