GREEN AUDIT REPORT

1. About Green Audit

Green Audit is a process of systematic identification, quantification, recording, reporting and analysis of components of environmental diversity of various establishments. It aims to analyze environmental practices within and outside of the concerned sites, which will have an impact on the eco-friendly ambience.

Green audit can be a useful tool for a college to determine how and where they are using the most energy or water or resources; the college can then consider how to implement changes and make savings. It can also be used to determine the type and volume of waste, which can be used for a recycling project or to improve waste minimization plan. It can create health consciousness and promote environmental awareness, values and ethics. It provides staff and students better understanding of Green impact on campus. If self enquiry is a natural and necessary outgrowth of a quality education, it could also be stated that institutional self enquiry is a natural and necessary outgrowth of a quality educational institution. Thus it is imperative that the college evaluate its own contributions toward a sustainable future. As environmental sustainability is becoming an increasingly important issue for the nation, the role of higher educational institutions in relation to environmental sustainability is more prevalent.

The rapid urbanization and economic development at local, regional and global level has led to several environmental and ecological crises. On this background it becomes essential to adopt the system of the Green Campus for the institutes which will lead for sustainable development and at the same time reduce a sizable amount of atmospheric carbon-di-oxide from the environment. The National Assessment and Accreditation Council, New Delhi (NAAC) has made it mandatory that all Higher Educational Institutions should submit an annual Green Audit Report. Moreover, it is part of Corporate Social Responsibility of the Higher Educational Institutions to ensure that they contribute towards the reduction of global warming through Carbon Footprint reduction measures.

In recent time, the Green Audit of an institution has been becoming a paramount important for self assessment of the institution which reflects the role of the institution in mitigating the present environmental problems. Many institutions undertake lot of good measures to resolve these problems but are not documented due to lack of green documentation awareness. All this non-scholastic efforts of the administrations play an important role in ensuring the green quotient of the campus is intact.

Therefore, the purpose of the present green audit is to identify, quantify, describe and prioritize framework of Environment Sustainability in compliance with the applicable regulations, policies and standards.

2. Objectives

Main Objectives of Green Audit :

1. Geographical Location
2. Floral and Faunal diversity
3. Meteorological parameter
4. Energy Consumptions
5. Waste disposal system
6. Ambient Environmental Condition
7. To avoid the interruptions in environment that are more difficult to handle and their correction requires high cost.
8. Awareness & Training on Sustainability for Students

3. Benefits

- It would help to prepare plan to protect the environment.
- Recognize the cost saving methods through waste minimization and management.
- Point out the prevailing and forthcoming impacts on environment.
- Ensures conformity with the applicable laws.
- Empower the organizations to frame a better environmental performance.
- It portrays a good image of an institute which helps building better relationships with the group of interested parties.
- Promotes the alertness for environmental guidelines and duties.

4. Green Audit Constitution

Constitution For Green Audit :-

The Green Audit is carried out as per the environmental policy of the Matoshree Vimalabai Deshmukh Mahavidyalaya, Amravati and Green audit checklist. The aim of the audit is to check the existing practices and provide advice for the development of environmental policy and practice in the areas of:

- Waste Management
 - i. Solid waste management
 - ii. E-waste management
- Water conservation and management
- Tree plantations
- Bio-diversity and threatened endangered species preservations
- Energy use and conservations
- Eco-friendly campus
- Green environment and clean campus

5. Executive Summary

The rapid urbanization and economic development at local, regional and global level has led to several environmental and ecological crises. On this background it becomes essential to adopt the system of the Green Campus for the institute which will lead for sustainable development. Shri Shivaji Arts and Commerce College, Amravati, is deeply concerned and unconditionally believes that there is an urgent need to address these fundamental problems and reverse the trends. Being a premier institution of higher learning, the college has initiated 'The Green Campus' program two years back that actively promote the various projects for the environment protection and sustainability.

The purpose of the audit was to ensure that the practices followed in the campus are in accordance with the Environmental Policy adopted by the institution. The methodology include: preparation and filling up of questionnaire, physical inspection of the campus, observation and review of the documentation, interviewing key persons and data analysis, measurements and recommendations. It works on the several facets of 'Green Campus' including Water Conservation, Tree Plantation, Waste Management, Paperless Work, Alternative Energy and Mapping of Biodiversity. With this in mind, the specific objectives of the audit are to evaluate the adequacy of the management control framework of environment sustainability as well as the degree to which the Departments are in compliance with the applicable regulations, policies and standards. It can make a tremendous impact on student health and learning in the college and the environment. The criteria, methods and recommendations used in the audit were based on the identified risks.

Ravi 

Dr. Ravi G. Deshmukh
Energy Auditor Class - A
MEDA/ECNCR-05/2018-19/EA-05

6. Observations & Recommendations

OBSERVED POINTS

1. College has prepared Green Environmental policy and has taken efforts for sustainable development on the college campus.
2. College has formed the team of faculty and student which works to maintain biodiversity on the campus and also participates in preventing pollution in society through various drives during different festivals, etc.
3. College has a system of Hazardous waste disposal through authorized agency.
4. College has conducted Environment. Awareness trainings and workshop for faculty and students.

RECOMMENDATIONS

1. College should go for ISO 14001:2015 certification
2. More number of Energy and flow meters to be installed for monitoring of energy and water consumption building wise/department wise.
3. PUC certificate for all the vehicles entering the campus to be made mandatory and to be checked by security.
4. College should maintain the legal register for the applicable environment related regulations and comply with this as per the requirement.
5. Bio-waste: Composting system to be adopted.
6. College has to install solar panels.

Remark : Since the building number and Campus is small , Installation of separate sewage treatment plant for these building is not economically feasible .

7. Overall Recommendations

- 1) Lab waste water quantity is not measured and drained to municipal drainage system.
- 2) Solid waste segregation is not done in lab as well as store room before final disposal.
- 3) Planning of chemical consumption and purchase to be ensured.
- 4) Calibration of instrument in lab to be done.
- 5) Composting of bio degradable waste to be scientifically done.
- 6) Septic tank sewage water analysis is to be done.
- 7) Plan for green belt development to be prepared.
- 8) Drinking water analysis shall be done as per IS 10500.
- 9) Rain water Harvesting (RWH) is to be done technically.
- 10) Reduction of wood policy.
- 11) Department wise electrical load consumption is to be done.
- 12) Energy used by each appliance is to be estimated.
- 13) List of equipment/instrument and their consumption of (energy/water) is to be estimated.
- 14) Awareness for energy and water conservation among students and staff by displaying boards.
- 15) Automatic leak detections in water flowing pipeline
- 16) Water usage reduction techniques to be used.
- 17) No previous for disposal of sanitary napkins. As per the Biomedical waste disposal Act.
- 19) Tree plantation shall be done to maintain biodiversity as well as artificial nesting shall be installed.
- 20) D. G. stack monitoring/Exhaust gas analysis shall be done.
- 21) Awareness among students and staff about green environment shall be done use tools like display boards.

PREFACE

Energy Audit is a key parameter of systematic approach for decision-making in the area of energy management. It attempts to determine how and where energy is used and to identify methods for energy savings. There is now a universal recognition of the fact that new technologies and much greater use of some that already exists provide the most hopeful prospects for the future. The opportunities lie in the use of existing renewable energy technologies, greater efforts at energy efficiency and the dissemination of these technologies and options.

As per the Energy Conservation Act, 2001, Energy Audit is defined as "the verification, monitoring and analysis of use of energy including submission of technical report containing recommendations for improving energy efficiency with cost benefit analysis and an action plan to reduce energy consumption".

Present energy audit is a mere mile marker towards destination of achieving safe, healthy and energy efficient unit. We would like to emphasize that an energy audit is a continuous process. We have compiled a list of possible actions to conserve and efficiently utilize our scarce resources and identified their savings potential. The next step would be to prioritize their implementation. Implementation of recommended measures can help consumers to achieve significant reduction in their energy consumption levels.

WHY ENERGY AUDIT?

An energy audit determines the amount of energy consumption affiliated with a facility and the potential savings associated with that energy consumption. Additionally, an energy audit is designed to understand the specific conditions that are impacting the performance and comfort in your facility to maximize the overall impact of energy-focused building improvements.

An energy audit is a systematic review of the energy consuming installations in a facility to ensure that energy is being used sensibly and efficiently. An energy audit usually commences with the collection and analysis of all information that may affect the energy consumption of the facility, then follows with reviewing and analyzing the condition and performance of various installations and facility management, with an aim at identifying areas of inefficiency and suggesting means for improvement.

Through implementation of the suggested improvement measures, facility owners can get the immediate benefit for paying less energy bills. On the other hand, lowering of energy consumption in facility will lead to the chain effect that the power supply companies will burn less fossil fuel for electricity generation and relatively less pollutants and greenhouse gases will be introduced into the atmosphere, thus contributing to conserve the environment and to enhance sustainable development.

ACKNOWLEDGEMENT

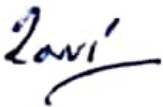

We express our sincere gratitude to the authorities of Matoshree Vimalabai Deshmukh Mahavidyalaya, Amravati for entrusting and offering the opportunity. It is our immense pleasure to present the detailed energy audit report.

We acknowledge the positive support from management in undertaking the task of Detailed Energy Audit of all electrical system, thermal systems, utilities and other area and for continuous help and support before and during the Detailed Energy Audit.

We are also thankful to all field staff and agencies working with whom we interacted during the field studies for their wholehearted support in undertaking measurements and eagerness to assess the system / equipment performance and saving potential. We admire the help of all concerned staff for their active participation in completing official documentations.

We express our sincere gratitude to the authorities of Matoshree Vimalabai Deshmukh Mahavidyalaya, Amravati for entrusting PPS Energy Solutions Pvt. Ltd.

For PPS Energy Solutions Pvt. Ltd.

Dr. Ravi G. Deshmukh

1. EXECUTIVE SUMMARY

Detailed Energy Audit was undertaken in order to evaluate energy performance and identify potential energy conservation measures. Detailed Energy Audit was undertaken in three steps, i.e. document review of data and information initially provided by facility, site visit and preparation of this report.

Energy Audit team conducted the site visit. The site visit includes interaction with staff, electricians of facility, the collection/review of further data and a field inspection of the facility and equipment.

The salient observations and recommendations are given below.

1. The Total Cost of Energy is around **Rs. 1,03,509/-** per Annum
2. Average monthly units consumed are **2640 kWh** equivalent to **Rs. 9200/-**
3. Average electricity charges works out to be **Rs. 6.94/-**

This brief report has therefore sought to provide a high-level overview of the status of energy efficiency at facility, combined with an illustration of areas where further, previously unidentified savings opportunities may exist.

Our survey has identified further potential opportunities, ranging from “no & low cost” measures, through to those that will require significant capital expenditure.

Note: Investment figures mentioned in are only indicative, further detailed study is recommended.

Summary of Recommended Energy Conservation Measures:

| Sr. No. | Equipment Name | ECM Details | Investment (Rs. In Lacs) | Savings (kWh/year) | Carbon credit (Tons of Co2) | Saving (Rs. In Lacs /Year) | Payback (Years) |
|--------------|----------------|---|--------------------------|--------------------|-----------------------------|----------------------------|-----------------|
| 1 | Tube Lights | Replacement of conventional lights with suitable LEDs | 0.89 | 3000 | 2.55 | 0.21 | 4.28 |
| 2 | Fans | Replacement of existing fans with energy efficient Super fans | 1.65 | 6683 | 5.68 | 0.46 | 3.55 |
| Total | | | 2.54 | 9683 | 8.23 | 0.67 | 3.78 |

Note: Estimated savings may base on operating conditions

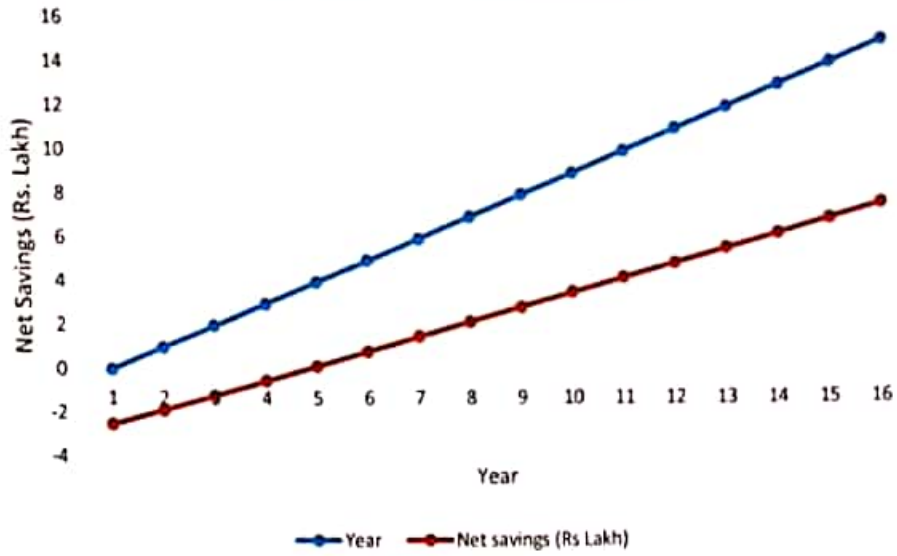

During the Energy Audit, Total Estimated Investment of Rs 2.54 Lac/- yields Total Estimated Savings of Rs. 67000/- which 65 % of the Total Energy Cost of Rs. 1,03,509 /- with an overall payback period of 3.78 Year.

Other Recommendations:

- A. Regular cleaning and maintenance of equipment's is important to reduce energy losses.
- B. Use of star rated equipment's is also strongly recommended specially in case of Fans.
- C. Cleaning of ceiling fan and exhaust fan blades will reduce the drag on the fan and intern will reduce energy loss.
- D. Awareness amongst energy users is very essential step to reduce wastage of electricity
- E. Energy conservation awareness programs can be conducted once a year. Increasing energy awareness of energy users motivates them to work as a team can lead to reductions in energy consumption and save the money.

| Year | Investment (Rs. In Lacs) | Saving (Rs.In Lacs /Year) | Cum Savings(Rs Lakh) | Net savings (Rs Lakh) |
|------|---------------------------|-----------------------------|----------------------|-----------------------|
| 0 | -3 | 0 | 0 | -3 |
| 1 | 0 | 1 | 1 | -2 |
| 2 | 0 | 1 | 1 | -1 |
| 3 | 0 | 1 | 2 | -1 |
| 4 | 0 | 1 | 3 | 0 |
| 5 | 0 | 1 | 3 | 1 |
| 6 | 0 | 1 | 4 | 1 |
| 7 | 0 | 1 | 5 | 2 |
| 8 | 0 | 1 | 5 | 3 |
| 9 | 0 | 1 | 6 | 4 |
| 10 | 0 | 1 | 7 | 4 |
| 11 | 0 | 1 | 7 | 5 |
| 12 | 0 | 1 | 8 | 6 |
| 13 | 0 | 1 | 9 | 6 |
| 14 | 0 | 1 | 9 | 7 |
| 15 | 0 | 1 | 10 | 8 |

Year Wise Net Savings (Rs.Lakh)

Net Savings (Rs.Lakh Vs Year)

Ravi 
Dr. Ravi G. Deshmukh
Energy Auditor Class - A
MEDA/ECNCR-05/2018-19/EA-05

2. GENERAL AUDIT REVIEW

Facility can implement faster payback energy conservation measures (ECMs) which have already been considered and for which the ECMs are fully developed.

Other General Points:

1. Energy conservation awareness programs can be conducted once a year. Increasing energy awareness of staff, students and motivating them to work as a team can lead to reductions in energy consumption and save the money. Savings estimates range in the order of 5 to 10%. When implemented effectively these savings can be realized quickly and cost effectively.
2. Most of the fans are of older design and not energy efficient.
3. Most of the places the tube light installed are energy efficient and fittings are in healthy condition.
4. Natural day light is efficiently used in corridor and few classrooms and labs areas.

It is believed that with the current approach and organization of energy management, energy can be reduced in a systematic, cost effective manner. We hope that this report will help facility to implement these changes and provide direction to the Energy Management Team.

3. ABOUT ENERGY AUDIT

Objective

The overall objective of the assignment is to quantify energy saving in existing system and achieve reduction in energy consumption pattern.

Hence the detail objectives are as under,

1. To calculate the energy consumption
2. To evaluate the performance of the equipment
3. To find out the energy saving opportunities
4. To quantify the total energy savings
5. To find out the ways to achieve energy efficiency

3.1. Scope of Work

Following is the scope of work envisaged for this assignment,

Data Collection

To collect the details of various electrical and mechanical system and their ratings, the available drawings and details shall be studied. Detail load list shall be prepared and checked.

A, B, C Analysis

With the details available from load list, analysis shall be carried out depending on the present usage trends. All the power consuming equipment's shall be classified in three categories depending on their ratings, condition and operating time. The area for larger potentials for savings shall be identified.

Field Study

The detail field study on site shall include the following as well as all other measures required for energy audit study,

- a. Lay out the system and study of Electrical distribution
- b. Study of area wise power distribution and Measurement of power consumption
- c. Study of instrumentation provided
- d. Measurement of motor currents, voltages, power etc. parameters by energy analyzer and measurement of water flow, pressures etc. parameters of pumps simultaneously and other measurements as needed to characterize the system and required for calculating efficiency at various combinations

- e. Study of air conditioner operations and system requirements
 - f. Analysis of readings obtained from field with the standard consumption.
- 3.2. Approach and Methodology
1. Understanding the Scope of Work and Resource Planning
 2. Identification of Key Personnel for the assignment/ project
 3. Structured Organization Matrix
 4. Steps in preparing and implementing energy audit assignment
 - a) Discussions with key facility personnel
 - b) Site visits and conducting “walk-through audit”.
 - c) Preliminary Data Collection through questionnaire before audit team’s site visit
 - d) Steps for conducting the detailed audit
 - Plan the activities of site data collection in coordination with the facility in-charge.
 - Study the existing operations involving energy consumption
 - Collect and collate the energy consumption data with respect to electricity consumption
 - Conduct performance tests to assess the efficiency of the system equipment/ electricity distribution, lighting, and identify energy losses.
 - Discuss with facility personnel about identified energy losses.
 5. List proposed efficiency measures
 - Develop a set of potential efficiency improvement proposals
 - Baseline parameters
 - Data presentation
 - System mapping
 - List of potential Energy Savings proposals with cost benefit analysis.
 - Review of current operation & maintenance practices
 6. Preparation of the Draft Energy Audit Report
 7. Preparation and submission of final Energy Audit Report after discussion with concerned persons

4. ENERGY DETAILS

Maharashtra State Electricity Distribution Company Limited (MSEDCL) provides the electricity supply for facility. Billing is carried out with the help of Dual meter according to 73/LT-X B Tariff.

Detailed Energy Audit was conducted for the load connected to the mains supply used.

Mainly energy is used on this facility for the following purposes:

- 1) Lighting Load
- 2) Ceiling Fans

Based on above it is clear that followings Equipments have highest potential for energy savings

Table 1 Name of Area

5. ENERGY CONSERVATION MEASURES

ECM 1: Replacement of Tube Lights with More Efficient Lights

| ECM No. | Energy efficiency improvement measures | Investment Rs. In Lakh | Estimated Saving | | Estimated Savings Rs. in Lacs | Estimated Payback Years |
|---------|---|------------------------|------------------|--|-------------------------------|-------------------------|
| | | | Electricity kWh | Carbon credit (Tons of CO ₂) | | |
| 1 | Replacement of conventional lights with suitable LEDs | 0.89 | 3000 | 2.55 | 0.21 | 4.28 |

Observations:

Facility has installed Tube Lights of 40 watt in their premises

Recommendations:

During energy audit, it is observed that facility has installed Tube Lights of 40 watt at some of the places in the facility. Also energy team at facility has already replaced some of the CFLs with LEDs. The operating hours for these lightings are around 5 hours. LED Lights of 20 watt with equivalent LED fixture thereby achieving significant reduction in energy consumption. The LEDs could be replaced in such a manner that it has same fixture so there will not be retrofitting cost attached to the replacement. The replacement could be done in a phased manner. LED lights have better efficacy as well as better lifetime than conventional lights.

Energy Saving Calculations:

| Particular | Unit | Value |
|---|----------|-------|
| Energy Saving Calculation | | |
| Power consumption of TL lamps | KW | 4.00 |
| Power consumption of suitable LED light | KW | 2.00 |
| Average power saving after replacement with LED light | KW | 2.00 |
| Replacement of conventional lights TL of 40W with suitable LEDs | Nos | 100 |
| Average working hour per day | Hrs | 5 |
| No. of working days in a year | Days | 300 |
| Cost Benefit Calculation | | |
| Annual Energy Saving potential | kWh | 3000 |
| Electricity tariff | Rs/unit | 6.94 |
| Annual Cost Saving | Rs. Lakh | 0.21 |
| Total investment cost | Rs. Lakh | 0.89 |
| Annual Saving | Rs. Lakh | 0.21 |
| Simple Payback Period | Years | 4.28 |

| Type of Existing Fitting | Watt age | Qty | Proposed LED W | Price - Rs/Unit | Dismantling Cost | Total Cost | Existing kW | Proposed kW | Saved kW | Investment Rs Lakh |
|--------------------------|-----------|------------|----------------|-----------------|------------------|--------------|-------------|-------------|----------|--------------------|
| Tube Light | 40 | 100 | 20 | 878 | 13 | 89100 | 4 | 2 | 2 | 0.89 |
| TOTAL | 40 | 100 | 20 | 878 | 13 | 89100 | 4 | 2 | 2 | 0.89 |

ECM 2: Replacement of Old Fan with Energy Efficient Super Fan

| ECM No. | Energy efficiency improvement measures | Investment Rs. In Lakh | Estimated Saving | | Estimated Savings Rs. In Lacs | Estimated Payback Years |
|---------|---|------------------------|------------------|--|-------------------------------|-------------------------|
| | | | Electricity kWh | Carbon credit (Tons of CO ₂) | | |
| 2 | Replacement of existing fans with energy efficient Super fans | 1.65 | 6683.34 | 5.68 | 0.46 | 3.55 |

Observations:

During energy audit, it is observed that facility has old 75 watts fan and its energy consumption is on higher side.

Recommendations:

During energy audit it is observed that facility has installed non star rated fan of 75 watts so we recommend to replace energy consuming fan with energy efficient super fan

Energy Saving Calculations:

| Particular | Unit | value |
|--|-------------|-------|
| Existing energy consumption of Fan | kWh/year | 9563 |
| Wattage of Energy Efficient Super Fan | Watt | 35 |
| Energy consumption after replacing with Energy Efficient Super Fan | kWh/year | 15 |
| Operating hrs/day | Hrs/day | 5 |
| No. of working days in a year | Days | 300 |
| Diversity factor | % | 70% |
| Annual Saving | kWh/year | 6683 |
| Unit rate | Rs/kWh | 6.94 |
| Annual Saving | Rs. In Lacs | 0.46 |

| Fan category | Nos | Estimated Running kW |
|------------------|-----------|----------------------|
| Ceiling Fan 75 W | 85 | 6.38 |
| Total | 85 | 6.37 |

6. List of Instruments

POWER ANALYSER

Picture 1 ALM 20 Power Analyzer

ALM 20 Power Analyzer is designed for Measuring power network parameters

TECHNICAL SPECIFICATIONS

| | |
|------------------------|---|
| Number of channels | 3U/3I |
| Voltage (TRMS AC + DC) | 100V to 2000V ph-ph / 50V to 1000V ph-N |
| Voltage ratio | Up to 650 kV |
| Current (TRMS AC + DC) | 5mA to 10,000 Aac / 50 mA to 5,000 Adc (depending on Clamp) |
| Current ratio | Up to 25 kA |
| Frequency | 42.5 - 69 Hz, 340 - 460Hz |
| Power values | W, VA, VAR, VAD, PF, DPF, $\cos \phi$, $\tan \phi$ |
| Energy values | Wh, VAh, VARh |
| Harmonics, THD | on V, U, I & In up to 50th order |
| Electrical safety | IEC 61010, 1000V CAT III / 600V CAT IV |
| Protection | IP54 |

DIGITAL CLAMP METER

Picture 2 MFCO 3150 DIGITAL CLAMP METER

Power Clamp meter is a Portable Digital multi-functional measuring instrument. Designed for Measuring selected power network parameters, AC/DC Voltage, AC/DC current, Resistance, Continuity, Diode and Frequency.

TECHNICAL SPECIFICATIONS

| | |
|---|--|
| DC VOLTAGE (Auto Ranging) | |
| Ranges | 4V, 40V, 400V, 1000V |
| Overload Protection | 1200V DC/800V AC |
| AC VOLTAGE (Auto Ranging) 40-500Hz | |
| Range | 4V, 40V, 400V, 750V |
| Overload Protection | 1200V DC/800V AC |
| RESISTANCE (Auto Ranging) | |
| Range | 400Ω, 4KΩ, 40KΩ, 400KΩ, 4MΩ, 40MΩ |
| Test Current | 0.7mA on 400Ω, 0.1mA on 4KΩ |
| Diode Test | |
| Measurement Current | 1.0 ± 0.6 mA Approx |
| Open Circuit Voltage | 0.4V Approx |
| Overload Protection | 500V DC / AC |
| Frequency (Auto Ranging) | |
| Range | 10.00Hz, 50.00Hz, 500.0Hz, 5.000kHz, 50.00kHz, 500.0kHz |
| Sensitivity | 3V |
| Overvoltage Protection | 200V DC or AC peak |

DIGITAL CLAMP METER

Picture 3 RISHI POWER CLAMP 1000 A/400 A AC-DC

Power Clamp meter is a Portable Digital multi-functional measuring instrument. Designed for Measuring selected power network parameters, AC/DC Voltage, AC/DC current, Resistance, Continuity, Diode and Frequency.

TECHNICAL SPECIFICATIONS

| Measuring function | Measuring range |
|--------------------------|-----------------|
| kWh | 9.999 kWh |
| | 99.99 kWh |
| | 999.9 kWh |
| | 9999 kWh |
| Ahr | 999.9 Ahr |
| Phase angle | 0.0°....360.0° |
| Power Factor | -1...0...1 |
| Harmonics (RMS & %) | 1...13 |
| | 14...49 |
| THD | 0...99.9% |
| Crest Factor | 1.0...2.9 |
| | 3.0...5.0 |
| Power Clamp 1000A peak | 1400 A/ 1400 V |
| Power Clamp 400A peak | 100 A |
| | 560 A/ 1000 V |
| Power Clamp 1000A INRUSH | 999.9 A |
| Power Clamp 400A INRUSH | 99.99 A |
| | 400 A |
| Resistance | 9999 Ohm |
| Continuity | Below 40 Ohm |

THERMAL IMAGER

Picture 4 | FLIR TG 167 Thermal imager

FLIR TG 167 Thermal imager is designed to easily find unseen hot and cold spots in electrical cabinets or switch boxes, giving you quality image detail on even small connectors and wires.

TECHNICAL SPECIFICATIONS

| | |
|--------------------------|---|
| Accuracy | ±1.5% or 1.5°C (2.7°F) |
| Detector Type | Focal plane array (FPA), uncooled micro bolometer |
| IR Resolution | 80 × 60 pixels |
| Laser | Dual diverging lasers indicate the temperature measurement area, activated by pulling the trigger |
| Memory Type | Micro SD card |
| Object Temperature Range | -25°C to 380°C (-13°F to 716°F) |
| Thermal Sensitivity/NETD | <150 mK |
| Display | 2.0 in TFT LCD |

INFRARED THERMOMETER

Picture 5 HTC IRX 64 Infrared thermometer

HTC IRX 64 infrared thermometer is useful instrument to measure the surface temperature. Infrared thermometers are ideal for taking temperatures need to be tested from a distance. They provide accurate temperatures without ever having to touch the object you're measuring (and even if your subject is in motion).

TECHNICAL SPECIFICATIONS

| Specification | Range |
|---------------------|-----------------------|
| IR | -50°C~1050 °C |
| Contact | -50°C~1370 °C |
| IR Temp. Resolution | 0.1°C |
| Basic Accuracy | +/- 1.5% of reading |
| Emissivity | Adjustable 0.10 ~ 1.0 |
| Optical resolution | 30 : 1 |

LUX METER

Picture 6 Nishant NE 1010 Lux meter
Nishant NE 1010 Lux meter is used to measure the lux levels.

TECHNICAL SPECIFICATIONS

| | |
|------------------------------------|---|
| Measuring range | 0 Lux □ 200, 000 Lux/0 Fc □ 185, 806 Fc |
| Accuracy | ± 3% rdg ± 0.5% f.s.(<10,000 Lux) ± 4% rdg ± 10% f.s.(>10,000 Lux) |
| Digital Updates | 2 times/s |
| Photometric sensor | Silicon diode |
| Battery life | 18 hours (continuous operation) |
| Operating temperature and humidity | 0°C □ 40°C, 10% RH □ 90% RH |
| Storage temperature and humidity | -20°C □ 50°C, 10% RH □ 90% RH |
| Power | 9V battery |
| Unit Size | 52.5 x 52.5 x 166 mm |
| Auto power off | After 5 minutes |

Pune 411021

Recommendations

Recommendations:

- Plant more trees in order to keep the air quality clean.
- Emergency preparedness plan for all types of disasters to be made evident at different visible locations to generate an awareness among students and staff members.
- Mock Drills should be carried out frequently in the college premises to keep everyone aware about different situations that may arise accidentally.
- Environment Day, earth Day, Ozone day to be celebrated in institute to create awareness.
- Legal register to be maintained.
- Paper consumption reduction programmes to be taken through usage of digital platforms.
- Feasibility for installing sewage treatment plant (STP) to be verified.
- ISO 14001:2015 (Environmental Management System) to be implemented.
- ISO 21001:2018 (Educational Organisation Management System) to be implemented.

Environmental Audit

About Environment Management Audit

Environmental auditing promotes financial savings through reduction of resource use. It gives an opportunity for the development of ownership, personal and social responsibility for the students and teachers. Thus it is imperative that the college evaluate its own contributions toward a sustainable future.

As environmental sustainability is becoming an increasingly important issue for the country, the role of higher educational institutions in relation to environmental sustainability is more important.

The periodic review of your campus environmental performance allows you to identify and remedy potential compliance concerns and other longer-term concerns (issues requiring some form of clean up and/or remediation)

An environmental audit and corrective action plan will help you maintain environmental compliance throughout your supply chain and protect your institutes reputation. Ensure that the companies institutes you work with are operating legally under local laws and ISO 14001 best practices, and reinforce your image as an environmentally-conscious institute.

The ISO 14001 family of standards includes:

- Legal requirements and risk assessment
- Environmental management system
- Solid and hazardous wastes
- Waste water
- Air emissions
- Nuisance
- Energy use, water use, CO2 emissions

About Matoshree Vimalabai Deshmukh Mahavidyalaya:

Matoshree Vimalabai Deshmukh Mahavidyalaya, is one of the oldest colleges in Amravati region. It is run by Shri Shivaji Education Society, Amravati's the biggest education society in Maharashtra and affiliated to Sant Gadge Baba Amravati University.

It is completely operational under the precious guidance of Principal **Dr. Smita R. Deshmukh**.

The college is established in the year 1956 with the recommendation of Radhakrishnan Commission as a **Rural Institute**. The main objective of Rural Institute is to break down economic and geographical barriers which prevent the rural population from taking full advantage of higher education and to help in bridging the gulf which unfortunately exists in our country between culture and work, between humanities and technology and between the practical and the ideal. However, in 1971 the nomenclature of the college is changed as College of Rural Services which is further changed in 1998 as **Matoshree Vimalabai Deshmukh Mahavidyalaya**.

The college is running **B.SC (Science), B.Sc. (Home Science), B.A.** courses affiliated to SGB Amravati University.

The college is the study Center of **Yashawantrao Chavan Maharashtra Open University, Nashik**. Under it **B.Lib.Science., M.Lib.** In library Information Science Courses are run successfully by the college.

The students are also having facility of getting education at junior college level including **XIth, XIIth** in **Science, Arts and Commerce** faculties and **H.S.C.V.C.** courses in three trades viz **Marketing & Salesmanship, Cookery and Medical Laboratory Technology**.

1005 Destiny Co-op housing Society, Swaraj garden Road, Near kate Petrol Pump, Pimple Saudagar, Pune 411021

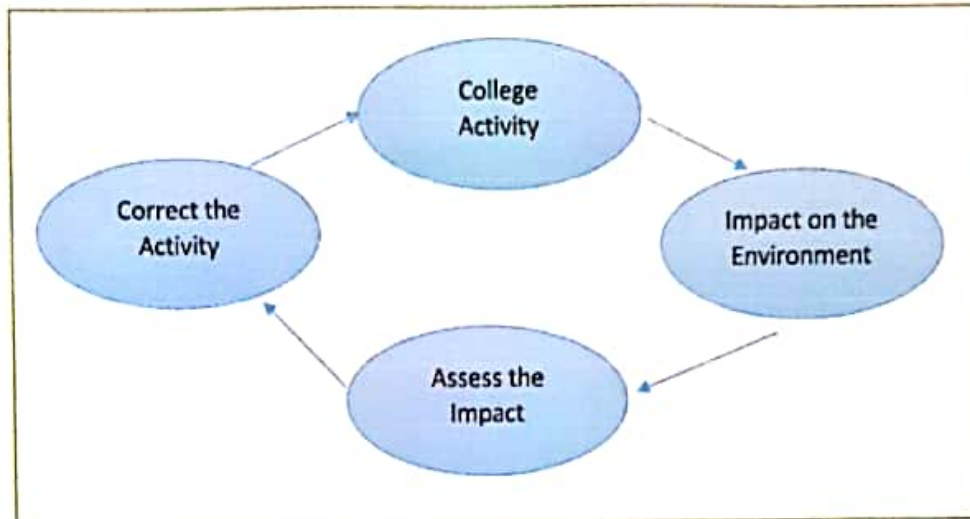

Benefits of the Audit:

- Facilitating comparison and interchange of information between operation or plants.
- Increasing employee awareness of environmental policies and responsibilities.
- Identifying cost-savings including those resulting from waste minimization.
- Evaluating training programmes and providing data to assist in training personnel.
- Providing an information base for use in emergency response arrangements.
- Assuring an adequate, up-to-date environmental database for internal management awareness and decision making in relation to plant modifications, new plans, etc.
- Helping to assist relations with authorities by convincing them that complete and effective audits are being undertaken, by informing them of the type of procedure adopted.

Objectives of the Audit:

Environmental auditing is a process whereby an organization's environmental performance is tested against its environmental policies and objectives.

- Environmental education through systematic environmental management approach
- Improving environmental standards
- Benchmarking for environmental protection initiatives
- Sustainable use of natural resource in the campus.
- Financial savings through a reduction in resource use
- Development of ownership, personal and social responsibility for the College campus and its environment
- Enhancement of College profile
- Developing an environmental ethic and value systems in young minds.

ACTIVITIES

REPORT

मातोश्री विमलाबाई देशमुख महाविद्यालय अमरावती एवं 4 MAHGIRL'S B.N.NCC अमरावती द्वारा Plogging कार्यक्रम ऑनलाइन संपन्न हुआ।

1. 2.10.2020 को कॅडेट कल्याणी शिंदे ने Plogrun रुखमिणी नगर से अमरावती बस डेपो तक Plogran किया। उसने रास्ते का प्लास्टिक कचरा उठाकर कूडेदान में डाला।
2. 3.10.2020 स्वच्छता अभियान एवं वृक्षारोपन में कॅडेट प्रतिक्षा मेंटागे द्वारा नांदुरा गाँव में सहभाग लिया।
3. 10.12.2020 को कॅडेटसने स्वच्छता अभियान में शिवटेकडी पब्लीक पार्क की साफसफाई की। छात्रों को यह समझाया की पार्क की सफाई करना हमारा कर्तव्य है। क्योंकि अच्छे वातावरण के लिए यह जरुरी है।
4. 11.12.2020 को कॅडेट ने गोपालपूर गाँव में बस स्टाप पर अपने साथ गोपालपूर युवाओं को Plogging का महत्त्व समझाकर स्वयं के साथ दूसरों को भी प्लास्टिक उठाने के लिए प्रेरित किया। इस तरह गोपालपूर गाँव में प्लॉगिंग का कार्य किया। प्लास्टिक को अलग कर व कचरे को उठाकर कूडेदान में डाला।
