Poster Competition on "Pollution control" on 07/ 03/2022

Organized by Department of Mathematics

- **Goal of the Poster Competition:**

Pollution prevention protects the environment by conserving and protecting natural resources while strengthening economic growth through more efficient production in industry and less need for households, businesses and communities to handle waste.

Aims and Objectives of Poster Competition :

1. Pollution influences both soil and agriculture which are the two facets of valuable resource necessary for our sustenance.
2. For agriculture, soil is generally assumed as an inexhaustible resource, which is used and overused continually for increasing production.
3. Pollution Prevention means eliminating or reducing the amount and toxicity of potentially harmful substances at their sources, prior to generation, treatment, off-site recycling or disposal. It emphasizes preventing or minimizing pollution, rather than controlling it once it is generated.
